Learning outcomes	Upon finishing this course, the students will be able to recognize the basic morphological units and will know the methods for determining the types of those units; know the role of inflectional and derivational morphemes and the differences between them; be able to recognize the canonical and non-canonical word-formation processes and their rules and constraints; understand terms such as heads and modifiers of morphological units; understand the concept of productivity of individual morphemes and word-formation processes and know the basic methods for calculating productivity; be aware of the importance of language corpora in linguistic and morphological research; and understand the connections between morphology and other linguistic branches.				
Learning outcomes at the Programme level	Upon completing this course, the students will be able to recognize and describe relevant ideas and concepts, connect different approaches, perceptions, and knowledge through an interdisciplinary approach, apply a critical and self-critical approach in argumentation, carry out scientific research investigations, apply ethical principles in conducting investigations and in resolving issues independently and in a group, and recognize, explain, link and apply phonological, morphological and syntactic structures of the English language.

Course description	The aim of this course is to prepare the students for individual morphological analysis of words in the English language. The students will be acquainted with the basic notions of English morphology, basic theoretical assumptions about the fundamental units in morphology, adopt the rules of various modes of word-formation in English, understand the different approaches to the study of morphology of the English language, its diachronic and psycholinguistic aspects, and the interfaces between morphology and other linguistic branches, such as phonology, syntax, and semantics. The methods used in this course are: lectures, seminars which involve solving tasks from lectures, a seminar paper with a topic from English language morphology, additional selected readings and using language corpora.				
Course content	<ol style="list-style-type: none"> 1. Introduction – What is morphology? The goals of morphology. 2. Basic morphological terms: morphemes, lexemes, morphs... 3. Inflection 4. Word-formation (derivation) 5. Mid-term I 6. Affixation and its types; roots, stems, affixes 7. Compounding, types of compounds 8. Other modes of word-formation 				

	<p>9. Word structure 10. Mid-term II 11. Diachronic aspects of English morphology 12. Psycholinguistic and neurolinguistic aspects of English morphology 13. Productivity and corpus linguistic approaches to the analysis of English morphology 14. Interfaces between morphology and other linguistic branches 15. Preparations for the final exam</p>
