Learning outcomes						<p>By the end of the course students will acquire basic knowledge in the field of semantics, and will be able to:</p> <ul style="list-style-type: none"> -define basic semantic concepts and interpret their relationship -analyze relations between different linguistic structures of the English language (phonological, morphological and syntactic) and the semantic dimension of language -interpret the relevance of linguistic usage and extralinguistic context in the analysis of meaning -analyze the cognitive dimension in the description of meaning 						
Learning outcomes at the Programme level						<ul style="list-style-type: none"> -recognize and describe relevant ideas and concepts -connect different approaches, perceptions and knowledge through an interdisciplinary approach -use and assess semantic theories in the explanation of the meaning of the language and resolve misunderstandings in communication

Course description	The aim of the course is to introduce the basic concepts and relations that emerge within a range of semantic phenomena. Students are acquainted with the traditional and contemporary theoretical frameworks within which such phenomena are analyzed. The phenomena are analyzed primarily on the lexical level, as well as on paradigmatic and syntagmatic levels. Students are acquainted with basic semantic phenomena in class and through readings of literature relevant for a particular area of research. In the seminar part and on the basis of selected readings and exercises, they are encouraged to identify and analyze the same phenomena.
