Learning outcome	s				Upon completing this course, the students will be able to:								to:				

			he importance of date in linguistic							
		recognize and explain the difference between the main types of linguistic data;								
			he main types of orocedures and re							
			conduct their ow llected within the							
		• use questio data;	onnaires and surv	eys for col	lection	of linguistic				
		conduct the appropriate procedures for analysing, summarising and describing collected quantitative linguistic data;								
		design and formulate their own research designs and hypotheses and test those hypotheses using appropriate statistical procedures;								
		summarize and present the results of their own linguistic research;								
		correlate the results of their research with the results of previous linguistic research;								
		explain and provide arguments for the choice of particular methods and ways of conducting research;								
		summarize and analyse the results of their research and evaluate the importance of those results within the contemporary scientific discoveries and theoretical models of language; and								
		apply the acquired research skills in the international scientific and professional environment.								
Learning outcome Programme level	s at the	Upon completii	ng this course, the	e students	will be	able to:				
l rogramme rever		• apply a crit	ical and self-criti	ical approa	ich in a	rgumentation;				
		carry out scientific research investigations;								
		apply ethical principles in conducting investigations and in resolving issues independently and in a group;								
		assess the importance of working in an international context.

Exam dates		17/6/2024	9/9/2024							
Course	Quantitative date are the heal-he	1/7/2024	23/9/2024							
Course description	Quantitative date are the backbone of research in all linguistic disciplines, which is why understanding and using appropriate methods for processing and analysing quantitative data is paramount for conducting linguistic research. The aim of this course is to present some of the most fundamental and the most commonly used methods for analysing quantitative data collected through empirical research and prepare the train the students how to use these methods in their own work. Within the scope of this course, the students will learn how to use a computer to process data collected through quantitative linguistic research, how to use appropriate statistical procedures for summarizing, describing and presenting collected data, how to formulate hypotheses and research questions and test them using appropriate statistical procedures, how to use computer programs for statistical analysis, how to formulate and write research proposals									
	and reports, how to clearly and concisely present the results of their own re and how to form a critical opinion based on collected quantitative data.									
Course content	<ol> <li>Introduction</li> <li>Types of variables (dependent/independent, numerical/categorical), variable levels, and types of measurement and scales, hypotheses</li> <li>Stages of the research process, research questions, research designs, samples</li> <li>Surveys and questionnaires I</li> <li>Surveys and questionnaires II</li> <li>Discussion I</li> <li>Descriptive statistics I – Frequency, measures of central tendency, measures of dispersion</li> <li>Inferential statistics I – Normal distribution, probability, parametric and non-parametric tests</li> <li>Inferential statistics II – Chi-squared, degrees of freedom</li> <li>Inferential statistics III – T-test</li> <li>Inferential statistics IV – Analysis of variance (ANOVA)</li> <li>Inferential statistics V – Regression analysis, Pearson correlation coefficient</li> <li>Mid-term</li> <li>Presenting data I – Formulating a research proposal and a research report, writing tips</li> </ol>

Note /Other		nce with A	rt 6 of the	Code of Eth	ics of the Co	mmi	ttee f	or Ethics in					
Note /Other	In accordance with Art. 6 of the <i>Code of Ethics</i> of the Committee for Ethics in Science and Higher Education, "the student is expected to fulfil his/her obligations honestly and ethically, to pursue academic excellence, to be civilized, respectful and free from prejudice."  According to Art. 14 of the University of Zadar's <i>Code of Ethics</i> , students are expected to "fulfil their responsibilities responsibly and conscientiously. []  Students are obligated to safeguard the reputation and dignity of all members of the university community and the University of Zadar as a whole, to promote moral and academic values and principles. []  Any act constituting a violation of academic honesty is ethically prohibited. This includes, but is not limited to:  - various forms of fraud such as the use or possession of books, notes, data, electronic gadgets or other aids during examinations, except when permitted;  -various forms of forgery such as the use or possession of unauthorised materials during the exam; impersonation and attendance at exams on behalf of other students; fraudulent study documents; forgery of signatures and grades; falsifying exam results."  All forms of unethical behaviour will result in a negative grade in the course without the possibility of compensation or repair. In case of serious violations the <i>Rulebook on Disciplinary Responsibility of Students at the University of Zadar</i> will be applied.  In electronic communications only messages coming from known addresses with a first and a last name, and which are written in the Croatian standard and appropriate academic style, will be responded to.												

Form 1.3.2. Syllabus

Statistical programs are used for the purpose of this course, which is students should have and use their own laptops.
